Energy Generater

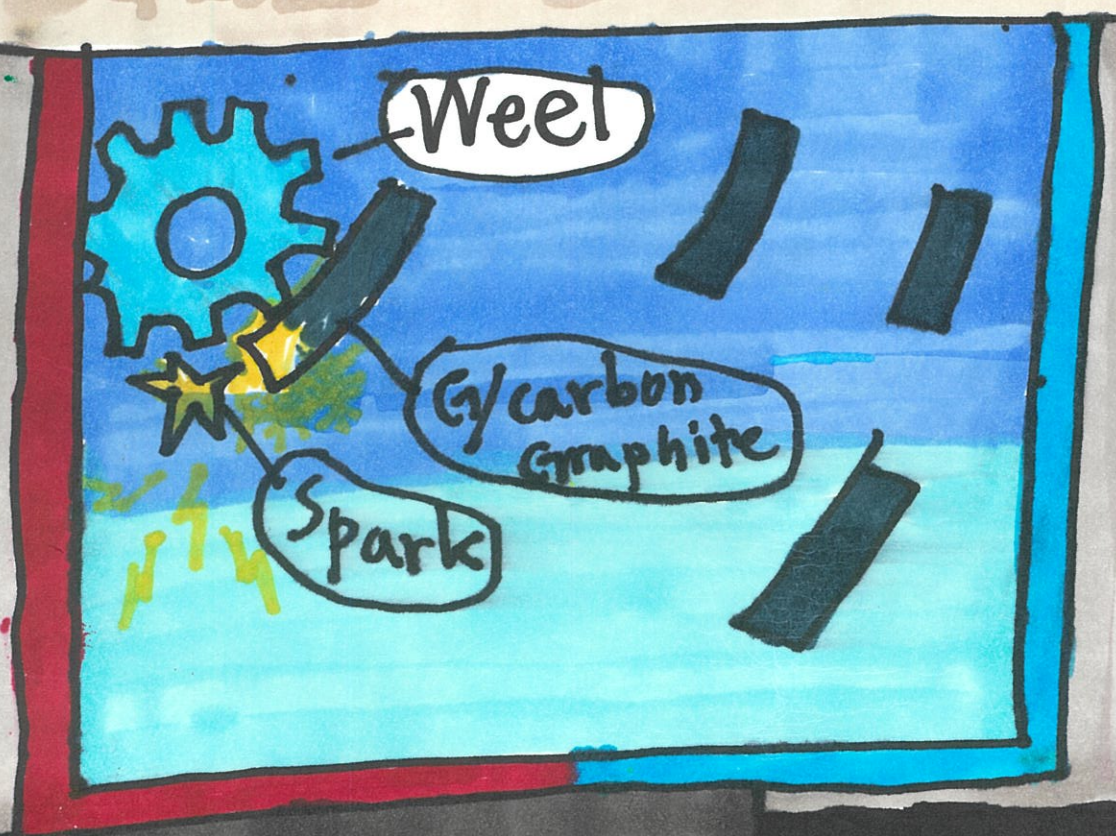
(Without carbon dioxide.)

① Floor energy (As you step)

② Door energy (As you open the door)

③ Bycle or car energy (by spinning weels)

How it works



Why did I made this idea:

I realized all the global warmings and the non-sustanible energy making around the wrold.

I made my idea as sustanible energy making so everyone uses the energy without creating CO^2. It reices the arfu ocean.
