

# WORKSHEET

This year marks the third edition of the SDGs Ideas Contest for Kwansei Gakuin students. Let's express your ideas using drawings and words!

## Theme

## Sustainable initiatives I wish my school had!

(※ 'initiatives' are plans or actions to achieve something)

'Sustainable' means taking care of things for the future. For example:

- ★ Caring for nature: Reducing waste and planting new trees.
- ★ Helping each other: Supporting people in need and making sure everyone can live happily.
- ★ Using money wisely: Avoiding waste and thinking about how to keep everyone happy in the future.

By doing these things, we make sure future generations can also live happily—that's what sustainability is all about!

## 1. What things do you wish your school could have in the future?

★ Let's write down sustainable initiatives that you wish your school had or could do in the future!

### Thinking tips

- Think about things that would be fun or make everyone happy if they existed.
- Look for problems or things that are difficult in daily life. What could help solve them or be useful?

★ Think about why you want your idea to become real.

### Thinking tip

- If your idea becomes real, **who or what** will change, and **in what way**?

## 2. Try to picture your idea clearly in your mind

★ Try to imagine your idea in detail.  
What color and shape does it have?  
What kind of thing can it do?  
What are its special features?

★ If your idea becomes real, what good things might happen? Write down your thoughts!

## 3. When you're ready, let's start writing and drawing on Application Form ①!

★ There are two Application Forms!

Draw and write to show your idea!

Form ①  
(A3-sized  
single page)

Form ②  
(single page)

Tell us more about your idea!
